Subject: Magna Metals Field Work

Hi, this e-mail is a follow up to the telephone conversation Don and I had this morning.

Groundwater sampling will start the week of September 22 (about two weeks after completion of the development of the wells). At this time Tetra Tech will complete the refuse pile sampling and locate the terminus of the pipe leaving pit #5.

Tetra Tech has not started surface water and pond sediment sampling yet because they still do not have permission to enter that area from the land owner.

If you have any questions or comments, please call or e-mail. thanks, Sally
